CE

Certified

Certified by NRTL

Conforming to OSHA / ANSI

Certified [**SF4C-H□(J-05)** only]

Category 4 PLe SIL3

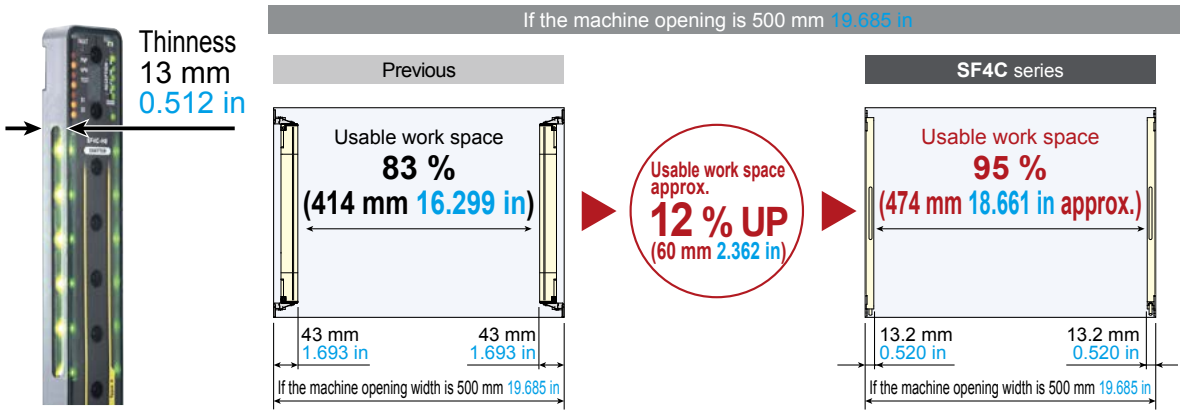
panasonic.net/id/pidsx/global

The control category differs depending on the configuration and wiring of the external circuit.

Machine safeguarding without sacrificing productivity

Slim size for efficient applications

Available work space is expanded from the previous model, and productivity is improved.

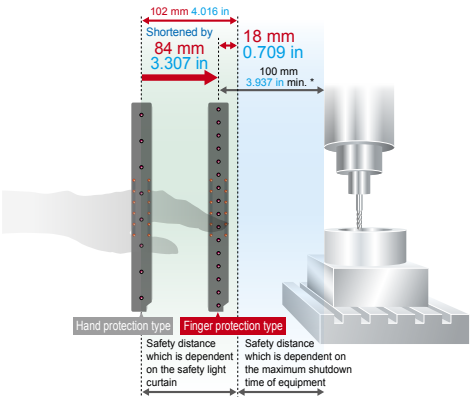


Shorter safety distance to downsize equipment Finger protection type

The safety distance of **SF4C** series finger protection type is 84 mm 3.307 in shorter than that of **SF4C** series hard protection type (**SF4C-H□**). As a result, the depth and guard of the equipment can be downsized.

SF4C series	Safety distance	
Hand protection type	102 mm 4.016 in	Shortened by 84 mm 3.307 in
Finger protection type	18 mm 0.709 in	

* Calculation based on ISO 13855 with 41 ms or longer being the machinery's maximum stopping time.



* The safety light curtain cannot be installed within a distance of 100 mm 3.937 in. (ISO 13855)

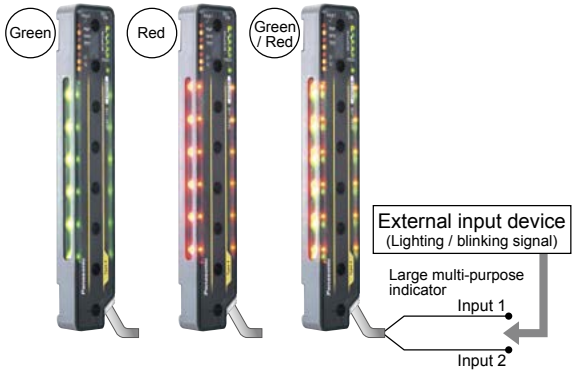
Definition of Sensing Heights

Can be used in a variety of applications for simplified equipment [Large multi-purpose indicator]

The bright LED indicators located in the center of both sides of each safety light curtain can be illuminated by using external inputs. There is no need for setting up a separate indicator, so that equipment is consolidated.

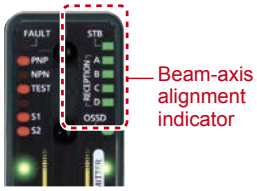
* The lighting conditions of **SF4C** series can be changed by using a handy-controller **SFC-HC** (optional). It is possible to actuate the lighting together with internal operation, regardless of connection of the large multi-purpose indicator input wires.



Use as an operation indicator	Use as an error indicator	Use as a muting lamp
● Solid green Equipment is operating  ● Solid red Emergency stop 	● Blinking red Error present  Normal Normal Error blinking  Confirm detail of error quickly on the digital display. * The photo is **SF4C-H□**. **SF4C-F□** differs in the position of digital display.	 * If a failure diagnosis of muting lamp is needed as by the result of risk assessment, use the handy-controller **SFC-HC** (optional) to change the setting, and connect the muting lamp output wire (red) of this safety light curtain to an incandescent lamp separately.
Use the handy-controller **SFC-HC** (optional) to change lighting conditions.		

Beam-axis alignment indicators help to reduce startup time

The beam channels of the safety light curtain are displayed in four blocks so that incident light position is shown at a glance. When the beam channel at the bottommost channel (or topmost channel), which is used as a reference for beam-axis alignments, is correctly aligned, the LED blinks red. After this, each block lights red as the beam axes successively become aligned. When all channel beam axes are aligned, all LEDs light green. The display also has a stability indicator (STB) added so that setup can be carried out with greater stability.



A single model supports both PNP and NPN polarities reducing model numbers

PNP transistor output and NPN transistor output are combined in a single model. Overseas equipment that uses PNP, replacement with NPN sensors, factories that are positively grounded, and transfer of equipment overseas are all situations where the control circuits for a single model are suitable for use worldwide.

Lightweight!

The **SF4C** series is made of resin that is approx. 45 % lighter than the conventional aluminum case type. Its lightweight body eases the burden on the mounting surface of the equipment and contributes to overall reduced weight during equipment transportation or overseas shipment.

* Except the cable part

IP67 protection structure

An IP67 (IEC) rating is achieved even in an ultra-slim resin body by using a laser welding method.

A fast response time for all models

SF4C-H□: 7 ms*, SF4C-F□: 9 ms*

The **SF4C** series reduces the safety distance as well as the calculation work required for the safety distance among models with different beam channels.

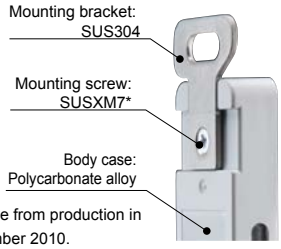
* When connecting safety sensors (safety light curtains, etc) to the safety input,the response time will be the total time of connected units.

Mutual interference is reduced without needing for interference prevention lines

The ELCA (Extraneous Light Check & Avoid) function automatically shifts the scan timing in order to avoid interference.

Material suitable for manufacturing a secondary battery

SF4C body is made of resin and the mounting bracket is made of Stainless Steel (SUS), so materials used are limited. Suitable for manufacturing secondary batteries or for food production equipment.



* Effective from production in November 2010.

Reducing the number of malfunctions caused by extraneous light

Double scanning method and retry processing are effective in eliminating the effects of extraneous light.

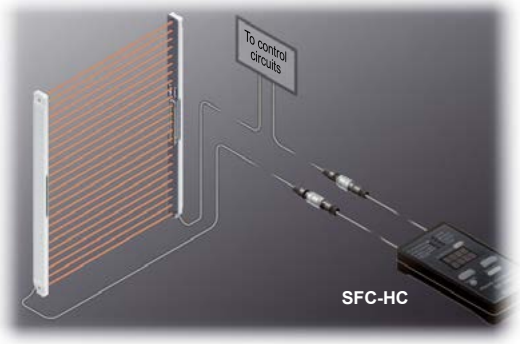
Handy-controller SFC-HC (Opitonal) enables the user to select a variety of settings HC

Operation of the large multi-purpose indicators can be configured

Mode No.	Operation of large multi-purpose indicators (factory setting: mode 0)					
	Large multi-purpose indicator 1	Large multi-purpose indicator 2	Control outputs (OSSD 1 / OSSD 2)		Muting function	Override function
	High or Low	High or Low	ON	OFF	Valid	Valid
0	Lights up in red	Lights up in green	–	–	-	-
1	Blinks in red	Blinks in green	–	–	-	-
2	Lights up in red	Blinks in green	–	–	-	-
3	Blinks in red	Lights up in green	–	–	-	-
4 (Note 1)	Lights up in red	Blinks in red	–	–	-	-
5 (Note 1)	Blinks in green	Lights up in green	–	–	-	-
6 (Note 1)	–	–	Lights up in green	Lights up in red	Blinks in green	-
7 (Note 1)	Lights up in red	Blinks in red	–	–	Lights up in green	Blinks in green

Notes: 1) Blinking takes precedence in case of same color brinks or light up.
2) During lockout, it is possible to blink in red.

Lockout blinking function	When lockout occurs
Valid	Blinks in red
Invalid	———



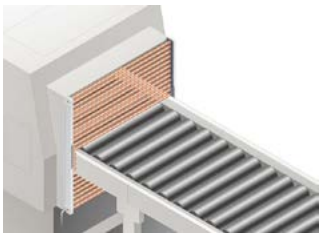
Fixed blanking function which allows selective beam channels to be activated improves productivity

The **SF4C** series is equipped with a fixed blanking function which allows specific beam channels to be selectively interrupted without causing the control output (OSSD) to output the OFF signal. This function is convenient for use with applications in which certain fixed obstacles tend to interrupt specific beam channels.

Auxiliary output has selectable output configuration

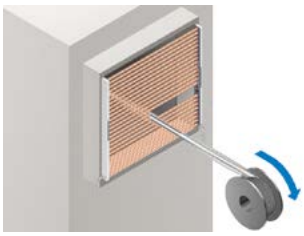
Mode No.	Description
0	Negative logic of the control outputs (OSSD 1, OSSD 2) (factory setting)
1	Positive logic of the control outputs (OSSD 1, OSSD 2)
2	For test input enabled: output OFF, For Disabled: output ON
3	For test input enabled: output ON, For Disabled: output OFF
4	For unstable incident beam: OFF (Note 1)
5	For unstable incident beam: ON (Note 1)
6	For muting: ON
7	For muting: OFF
8	For beam received: ON, For beam interrupted: OFF (Note 2)
9	For beam received: OFF, For beam interrupted: ON (Note 2)
A	For safety input enabled: ON, Disabled: OFF
B	For safety input enabled: OFF, Disabled: ON
C	For lockout: OFF
D	For lockout: ON

Notes: 1) The output cannot be used while the fix blanking function, floating blanking function or the muting function is activated.
2) This device outputs the beam received/interrupted state under activating the auxiliary output switching function using the handy-controller irrespective of activating other functions, fixed blanking function, floating blanking function, and muting function.



Floating blanking function which allows non-specified beam channels to be deactivated improves productivity

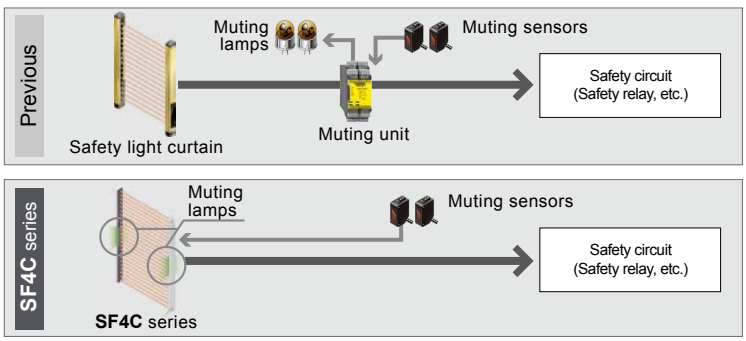
1, 2 or 3 non-specified beam channels can be deactivated. This function is useful in the event when an object passes through the safety light curtain's sensing area.



Note: When the floating blanking function is used, the size of the min. sensing object is changed.

Safety, productivity, and cost reduction [Muting control function]

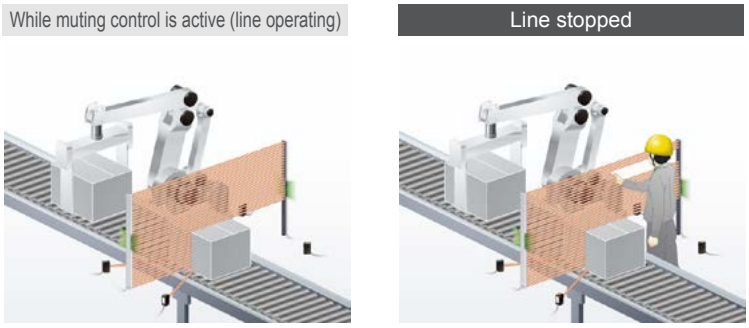
The safety light curtain has a built-in muting control function that causes the line to stop only when a person passes through the safety light curtain, and does not stop the line when an object passes through. The muting sensors and muting lamps can be connected directly to the safety light curtain. Furthermore, the large multi-purpose indicators can be used as muting lamps, which contribute to less wiring troubles, improvement of safety and productivity, and cost reduction.



* If a failure diagnosis of muting lamp is needed as by the result of risk assessment, use the handy-controller **SFC-HC** (optional) to change the setting, and connect the muting lamp output wire (red) of this safety light curtain to an incandescent lamp separately.

Selective muting area [Separate muting control function for each beam channel] HC

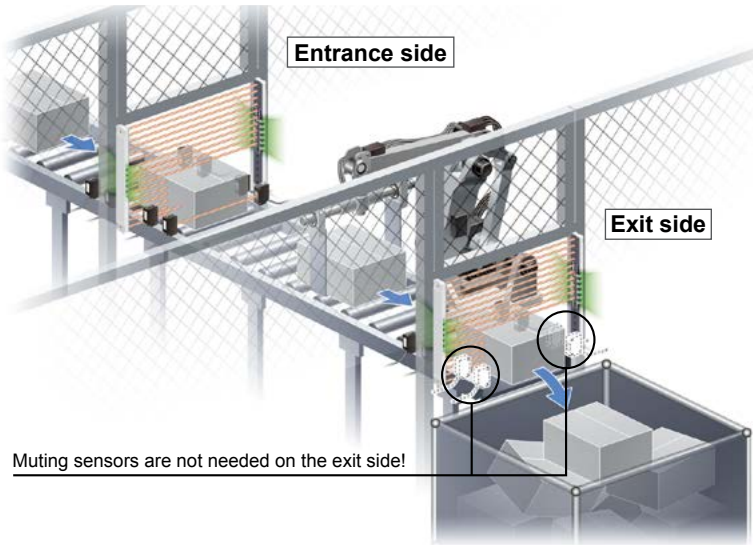
The handy-controller **SFC-HC** (optional) can be used to carry out muting control for specified beam channels only. Because individual beam channel can be specified to suit the object, separate guards to prevent entry do not need to be set up.



For example, depending on the height of the object, the muting function can be activated for 10 beam channels starting from the bottom most, so that if the 11th or subsequent beam channels are interrupted, it is judged that a person has entered the area and the line stops.

Safety measures when objects exit [Exit muting control function] HC

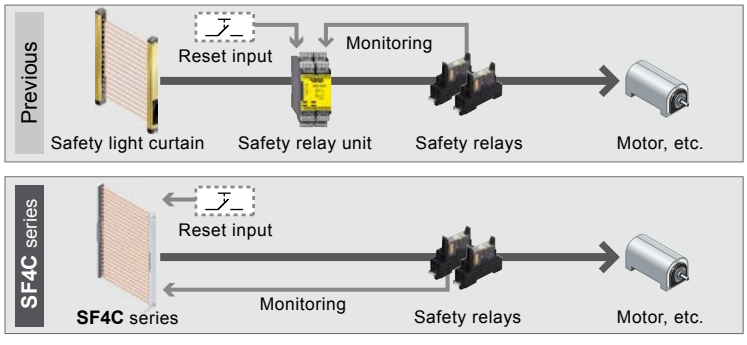
Muting at the exit of a machine is now possible using the handy-controller **SFC-HC** (optional). Just set a Max. four sec. delay timer on the muting sensors located at the exit. This is efficient for places with no installation space for muting sensors and also reduces cost and wiring.



By installing muting sensors only within the dangerous zone and setting up a delay timer on the sensor, muting control is made possible even on the exit side where muting sensors cannot be installed.

Safety circuit is constructed without the need for a safety relay unit [External device monitoring function]

The safety light curtain has a built-in external device monitoring function (such as deposited relay monitoring) and an interlock function. This allows a safety circuit to be constructed so that a separate safety relay unit is not needed, and the control box has become smaller to help to achieve to lower costs.

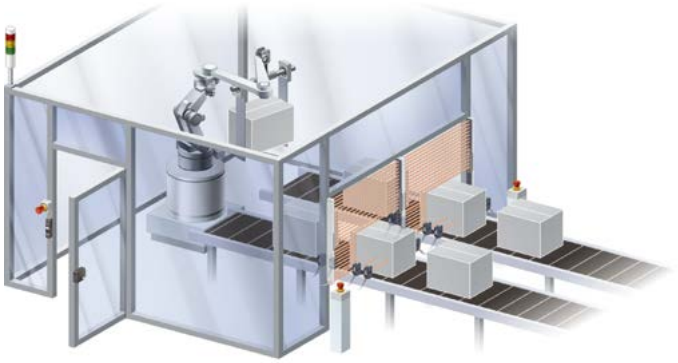


The safety light curtain can directly connect to external devices (safety relay, etc) without an exclusive control unit. This allows for simplified equipment, cost reduction, and error prevention.

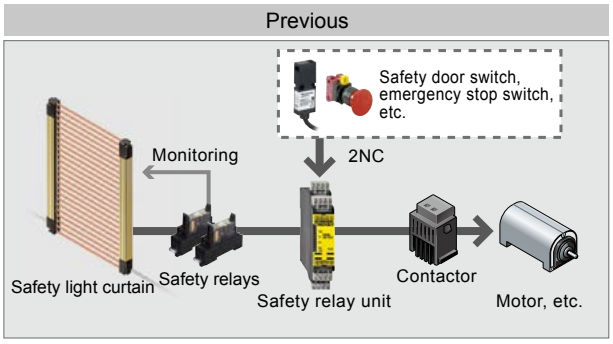
Industry first*! Wire-saving when connecting to safety devices [Safety input function]

Contact outputs such as an emergency stop switches or a safety door switches can be connected to the safety light curtain. Also, by using the handy-controller **SFC-HC** (optional) up to three sets of safety light curtains can be cascade connected for a consolidated safety output.

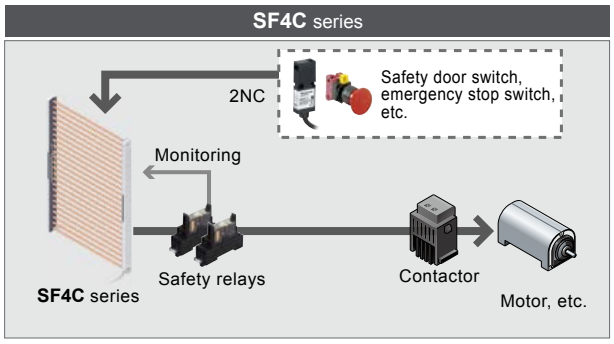
* As of March 2009, in-company survey



Direct connection of safety devices



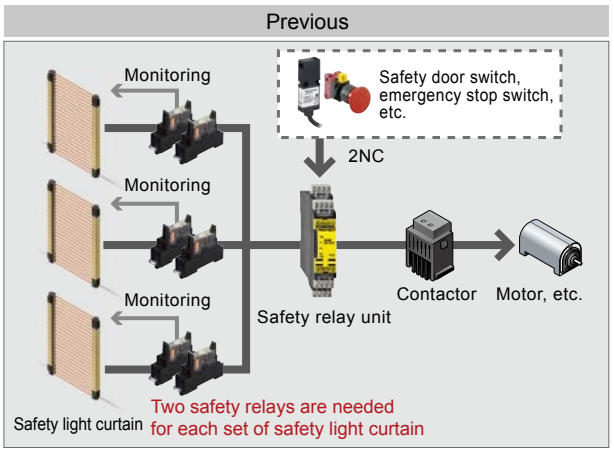
A safety relay unit is needed for connecting safety devices other than safety light curtain.



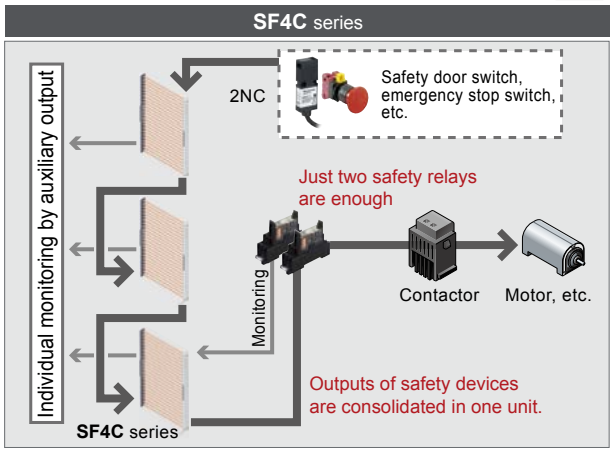
Direct connection of various safety devices is possible for a simplified safety circuit.

By using the handy-controller SFC-HC (optional) up to three sets of safety light curtains can be cascade connected for a consolidated safety output. (Note)

HC



Three sets of safety light curtains require three sets of safety relays.



Individual monitoring on safety light curtains is possible while the outputs of three sets of safety light curtains and other safety devices are consolidated in one unit.

Note: This setting is possible with the use of handy-controller **SFC-HC** (optional) for **SF4C** series Ver.2.1 or later.

PRODUCT CONFIGURATION

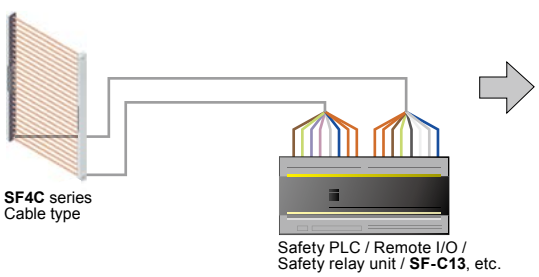
Item \ Type	With LED indicator	
Model No.	SFS3-L-DC24V	SFS4-L-DC24V
Part No.	AG1S132	AG1S142
Contact arrangement	3a1b	4a2b
Rated nominal switching capacity	6 A / 250 V AC, 6 A / 30 V DC	
Min. switching capacity	1 mA / 5 V DC	
Coil rating	15 mA / 24 V DC	20.8 mA / 24 V DC
Rated power consumption	360 mW	500 mW
Operation time	20 ms or less	
Release time	20 ms or less	
Ambient temperature	–40 to +85 °C –40 to +185 °F (Humidity: 5 to 85 % RH)	
Applicable standards	UL/c-UL, TÜV, Korea's S-mark	

Y-shaped connectors

Type	Appearance	Model No.	Description	
Wire-saving Y-shaped connector		**SFC-WY1**	Wire-saving connector for **SF4C-F□-J05** and **SF4C-H□-J05**. Cables of emitter and receiver are consolidated into one cable for wire-saving. Wiring has +24 V, 0 V, OSSD 1, OSSD 2, output polarity setting wire (shield), large multi-purpose indicator input 1, and large multi-purpose indicator input 2 only. Net weight: 40 g approx. [Power wire and synchronization wire are connected inside the connector. Interlock is disabled (automatic reset).]	
Cable with connector on one side		**WY1-CCN3**	Cable length: 3 m 9.843 ft Net weight: 200 g approx. (1 cable)	Mating cable for Y-shaped connector Cable color: Gray (with black line) Connector color: Black The min. bending radius: R6 mm R0.236 in Connector outer diameter: ø14 mm ø0.551 in max.
		WY1-CCN10	Cable length: 10 m 32.808 ft Net weight: 620 g approx. (1 cable)	

By using the Y-shaped connector, the least required wires such as power or safety output are consolidated into one cable. Man-hours taken for wiring is eliminated to the minimum. Construction times as well as wiring mistakes are greatly reduced.

Previous A total of 24 wires



Y-shaped connector Only 7 wires
Less wiring mistakes! Reduced wiring time!
Easy wiring to Safety PLC, etc.

Effective aperture angle		±2.5° or less [for an operating range exceeding 3 m 9.843 ft (conforming to IEC 61496-2 / ANSI/UL 61496-2)]			
Supply voltage		24 V DC $^{+10}_{-15}$ % Ripple P-P 10 % or less			
Control outputs (OSSD 1, OSSD 2)		PNP open-collector transistor / NPN open-collector transistor (switching method) <When selecting PNP output> • Max. source current: 200 mA • Applied voltage: same as supply voltage (between the control output and +V) • Residual voltage: 2.5 V or less (source current 200 mA, when using 10 m 32.808 ft length cable) • Leakage current: 200 µA or less (including power supply OFF condition) • Max. load capacity: 1 µF (No load to Max. source current) • Load wiring resistance: 3 Ω or less <When selecting NPN output> • Max. sink current: 200 mA • Applied voltage: same as supply voltage (between the control output and 0 V) • Residual voltage: 2.5 V or less (sink current 200 mA, when using 10 m 32.808 ft length cable) • Leakage current: 200 µA or less (including power supply OFF condition) • Max. load capacity: 1 µF (No load to Max. sink current) • Load wiring resistance: 3 Ω or less			
	Operation mode	ON when all beam channels are received, OFF when one or more beam channels are interrupted (OFF also in case of any malfunction in the safety light curtain or the synchronization signal)(Note 6,7)			
	Protection circuit	Incorporated			
Response time		OFF response: 9 ms or less, ON response: 90 ms or less	OFF response: 7 ms or less, ON response: 90 ms or less	OFF response: 9 ms or less, ON response: 90 ms or less	OFF response: 7 ms or less, ON response: 90 ms or less
Auxiliary output (Non-safety output)		PNP open-collector transistor / NPN open-collector transistor (switching method) <When selecting PNP output> • Max. source current: 100 mA • Applied voltage: same as supply voltage(between the auxiliary source and +V) • Residual voltage: 2.5 V or less (source current 100 mA, when using 10 m 32.808 ft length cable) <When selecting NPN output> • Max. sink current: 100 mA • Applied voltage: same as supply voltage(between the auxiliary sink and 0 V) • Residual voltage: 2.5 V or less (sink current 100 mA, when using 10 m 32.808 ft length cable)			
	Operation mode	OFF when control outputs are ON, ON when control outputs are OFF [Factory setting, operating mode can be changed using the handy-controller **SFC-HC**(optional).]			
	Protection circuit	Incorporated			
ELCA function		Incorporated (reducing mutual interference automatically)			
Test / reset input function		Incorporated			
Interlock function		Incorporated [Manual reset / Automatic reset (Note 8)]			
External device monitoring function		Incorporated			
Safety input function		Incorporated (safety contact)			
Muting function / Override function		Incorporated			
Optional functions (Note 9)		Fixed blanking, floating blanking, auxiliary output change, safety input (safety sensor), large multi-purpose indicator setting change, interlock setting change, external relay monitoring setting change, muting setting change, override setting change, protecting			
Pollution degree		3			
Operating altitude		2,000 m 6,561 68 ft or less (Note 10)			
Environmental resistance	Degree of protection	IP67 / IP65 (IEC)			
	Ambient temperature	–10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: –25 to +60 °C –13 to +140 °F			
	Ambient humidity	30 to 85 % RH, Storage: 30 to 85 % RH			
	Ambient illuminance	Incandescent light: 5,000 ℓx or less at the light-receiving face			
	Dielectric strength voltage	1,000 V AC for one min. between all supply terminals connected together and enclosure			
	Insulation resistance	20 MΩ, or more, with 500 V DC megger between all supply terminals connected together and enclosure			
	Vibration resistance	10 to 55 Hz frequency, 0.75 mm 0.030 in double amplitude in X, Y and Z directions for two hours each			
	Shock resistance	300 m/s² acceleration (30 G approx.) in X, Y and Z directions three times each			
Emitting element		Infrared LED (Peak emission wavelength: 855 nm 0.034 mil)			
Material		Enclosure: Polycarbonate alloy, Sensing surface: Polycarbonate alloy, MS-SFC-1 (Standard mounting bracket): SUS			
Cable		0.15 mm² (power line: 0.2 mm²) 12-core heat-resistant PVC cable with connector, 0.5 m 1.640 ft long		0.15 mm² (power line: 0.2 mm²) 12-core heat-resistant PVC cable, 5 m 16.404 ft long	
Cable extension		Extension up to 40.5 m 132.874 ft is possible for both emitter and receiver optional mating cables		Extension up to 40.5 m 132.874 ft is possible for both emitter and receiver, with 0.2 mm² or more cable (Note 11) (Note 12)	
Accessories		**MS-SFC-1** (Standard mounting bracket): 1 set, **SF4C-TR14** (Test rod): 1 No.	**MS-SFC-1** (Standard mounting bracket): 1 set, **SF4C-TR25** (Test rod): 1 No.	**MS-SFC-1** (Standard mounting bracket): 1 set, **SF4C-TR14** (Test rod): 1 No.	**MS-SFC-1** (Standard mounting bracket): 1 set, **SF4C-TR25** (Test rod): 1 No.

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
2) Regarding EU Machinery Directive, a Notified Body, TÜV SÜD, has certified with the type examination certificate.
3) With regards to the standards in the US, under the US regulation 29 CFR 1910.7, TÜV SÜD, a Nationally Recognized Testing Laboratory (NRTL) certified by OSHA, has certified with the safety certificate based on UL/ANSI standards. With regards to the standards in Canada, under the safety regulations based on CEC (Canadian Electric Code), TÜV SÜD America, a Certification Body accredited by SCC, has certified with the safety certificate based on CSA standards.
4) The operating range is the possible setting distance between the emitter and the receiver.
5) When the floating blanking function is used, the size of the min. sensing object is changed.
6) The outputs are not “OFF” when muting function is active even if the beam channel is interruped.
7) In case the blanking function is valid, the operation mode is changed.
8) The manual reset and automatic reset are possible to be switched depending on the wiring status.
9) In case of using optional function, the handy-controller **SFC-HC** (optional) is required.
10) Do not use or store in an environment pressurized to atmospheric pressure or higher at an altitude of 0 m.
11) When the muting lamp is used, the cable can be extended within 30.5 m 100.066 ft (for emitter / receiver).
12) When the synchronization + wire (orange) and synchronization - wire (orange / black) is extended with a cable other than exclusive cable, use a 0.2 mm² or more shielded twisted pair cable.

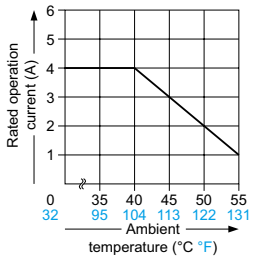
SPECIFICATIONS

Control unit

Item \ Model No.		SF-C13
Connectable safety light curtains		Safety light curtain manufactured by Panasonic Industrial Devices SUNX
Applicable standards		EN 61496-1 (Type 4), EN 55011, EN ISO 13849-1 (Category 4, PLe), IEC 61496-1 (Type 4), ISO 13849-1 (Category 4, PLe), JIS B 9704-1 (Type 4), JIS B 9705-1 (Category 4), ANSI/UL 61496-1 (Type 4), UL 1998 (Class 2)
CE marking directive compliance		Machinery Directive, Low Voltage Directive, EMC Directive, RoHS Directive
Control category		ISO 13849-1 (EN ISO 13849-1, JIS B 9705-1) compliance up to Category 4, PLe standards
Supply voltage / Current consumption		24 V DC ± 10 % Ripple P-P 10 % or less / 100 mA or less (without safety light curtain)
Fuse (power supply)		Built-in electronic fuse, Triggering current: 0.5 A or more, Reset after power down
Safety output		NO contact × 3 (13-14, 23-24, 33-34)
	Application category	AC-15, DC-13 (IEC 60947-5-1)
	Rated operation voltage (Ue) / Rated operation current (Ie)	30 V DC / 4 A, 230 V AC / 4 A, resistive load (For inductive load, during contact protection). Min applicable load: 10 mA (at 24 V DC) (Note 2)
	Contact resistance	100 mΩ or less (initial value)
	Contact protection fuse rated	4 A (slow blow)
Pick-up delay (Auto reset / Manual reset)		80 ms or less / 90 ms or less
Response time (Recovery time)		10 ms or less
Auxiliary output		Safety relay contact (NC contact) × 1 (41-42) (Related to safety output)
	Rated operation voltage / current	24 V DC / 2 A, Min. applicable load: 10 mA (at 24 V DC)
	Contact protection fuse rated	2 A (slow blow)
Semiconductor auxiliary output (AUX)		PNP open-collector transistor • Max. source current: 60 mA
	Output operation	On when the safety light curtain is interrupted
Excess voltage category		II
Polarity selection function		Incorporated (Cable connection allows selection of plus/minus ground) Minus ground: Correspond to PNP output safety light curtain Plus ground: Correspond to NPN output safety light curtain
Pollution degree		2
Environmental resistance	Protection	Enclosure: IP40, Terminal IP20
	Ambient temperature	–10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: –25 to +70 °C –13 to +158 °F
	Ambient humidity	30 to 85 % RH, Storage: 30 to 95 % RH
	Vibration resistance	Resistance/malfunction 10 to 55 Hz frequency, 0.35 mm 0.014 in double amplitude in X, Y, and Z directions twenty times each
Enclosure material		ABS
Weight		Net weight: 200 g approx.

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F
2) If several **SF-C13** units are being used in line together, leave a space of 5 mm 0.197 in or more between each unit. If the units are touching each other, reduce the rated operating current for safety output in accordance with the ambient operating temperature as shown in the graphs at right.
3) Refer to p.667 for details of the specifications for **SF-C13.**

Dilating when SF-C13 units are mounted close together



Handy-controller

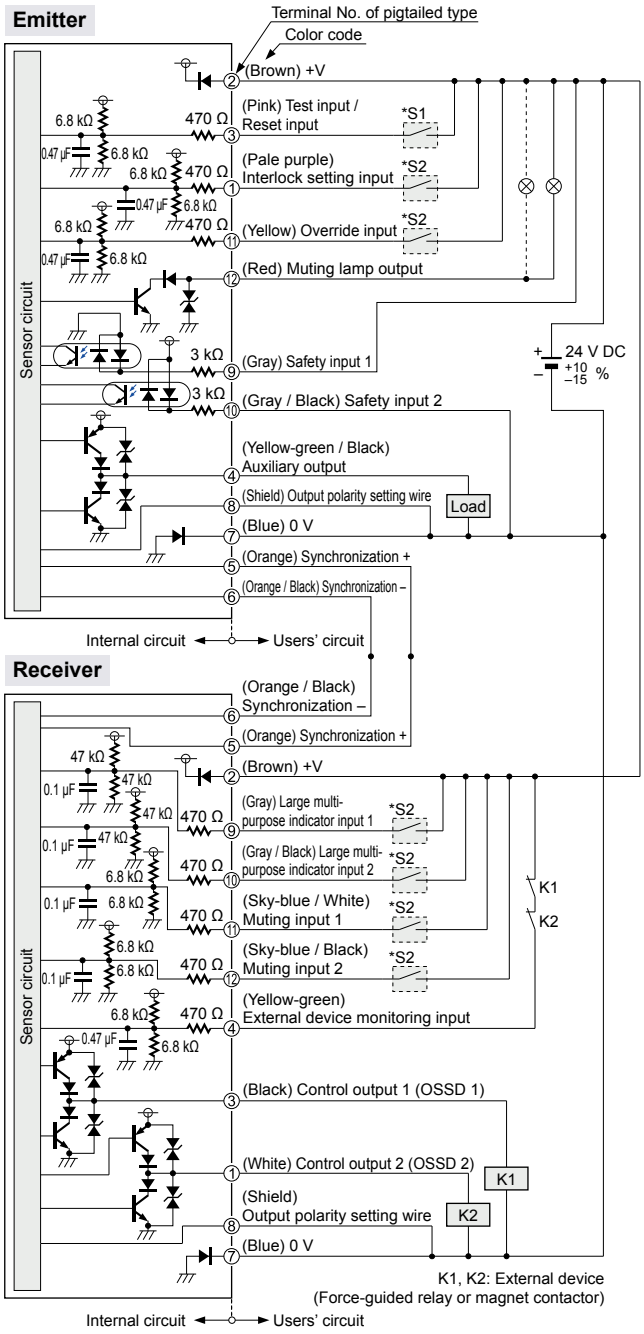
Item \ Model No.		SFC-HC
Supply voltage		24 V DC $^{+10}_{-15}$ % Ripple P-P 10 % or less (common to safety light curtain power supply)
Current consumption		65 mA or less
Communication method		RS-485 two-way communications (Specific procedure)
Digital display		4-digit red LED display × 2 (Selected beam channels, setting contents etc. are displayed.)
Function indicators		Green LED × 9 (Set function is displayed.)
Functions		Fixed blanking / Floating blanking / Auxiliary output change / Satety input setting change / Large multi-purpose indicator setting change / Muting setting change / Interlock setting change / External device monitoring setting change / Override setting changing function 60 sec. / Protecting
Environmental resistance	Ambient temperature	–10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: –25 to +70 °C –13 to +158 °F
	Ambient humidity	30 to 85 % RH, Storage: 30 to 85 % RH
	Voltage withstandability	1,000 V AC for one min. between all supply terminals connected together and enclosure
	Insulation resistance	20 MΩ, or more, with 500 V DC megger between all supply terminals connected together and enclosure
Cable		12-core shielded cable, 0.5 m 1.640 ft long, with a connector at the end (2 cables)
Weight		Net weight: 200 g approx.

Note: Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.

I/O CIRCUIT AND WIRING DIAGRAMS

I/O circuit diagram

<In case of using I/O circuit for PNP output>



* S1, S2

Switch S1
- Test input / Reset input
  For manual reset
  Vs to Vs – 3.5 V (sink current 5 mA or less): OFF (Note)
  Open: ON

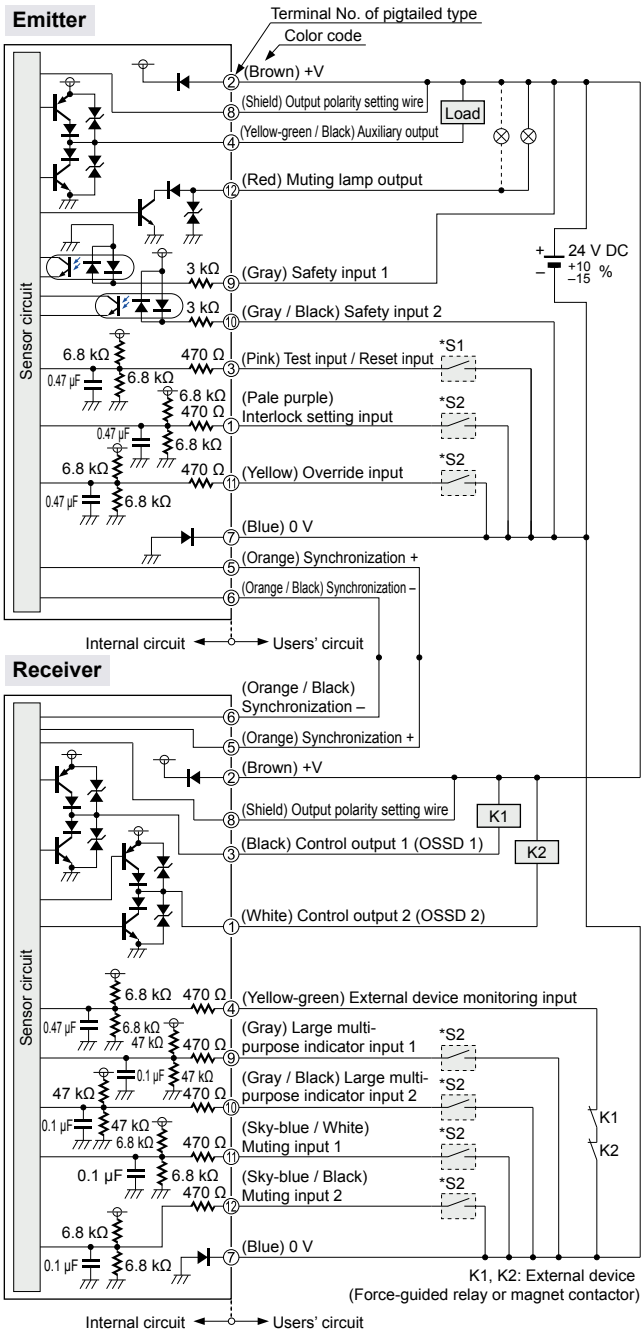
  For automatic reset
  Vs to Vs – 3.5 V (sink current 5 mA or less): ON (Note)
  Open: OFF

Switch S2
- Interlock setting input, Override input, Muting input 1/2, Large multi-purpose indicator input 1/2,
  Vs to Vs – 3.5 V (sink current 5 mA or less): Valid (Note)
  Open: Invalid

Note: Vs is the applying supply voltage.

I/O circuit diagram

<In case of using I/O circuit for NPN output>



* S1, S2

Switch S1
- Test input / Reset input
  For manual reset
  0 to +2.5 V (source current 5 mA or less): OFF
  Open: ON

  For automatic reset
  0 to +2.5 V (source current 5 mA or less): OFF
  Open: ON

Switch S2
- Interlock setting input, Override input, Muting input 1/2, Large multi-purpose indicator input 1/2,
  0 to +2.5 V (source current 5 mA or less): Valid
  Open: Invalid

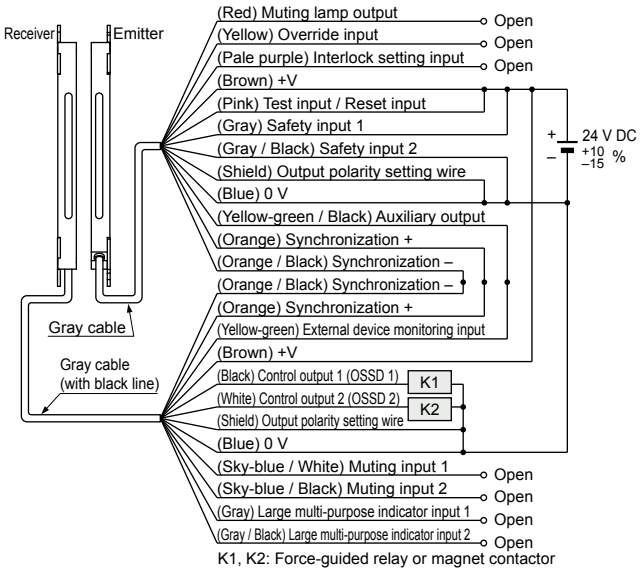
I/O CIRCUIT AND WIRING DIAGRAMS

Connection example

Basic wiring: Min. operation only

This is the general configuration using one set of the emitter and receiver facing each other. The control outputs (OSSD 1 / OSSD 2) turn OFF if the light is interrupted, while they automatically turn ON if receive the light.
The auxiliary output is used to invalid the external device monitoring function. The auxiliary output cannot be connected to external devices.

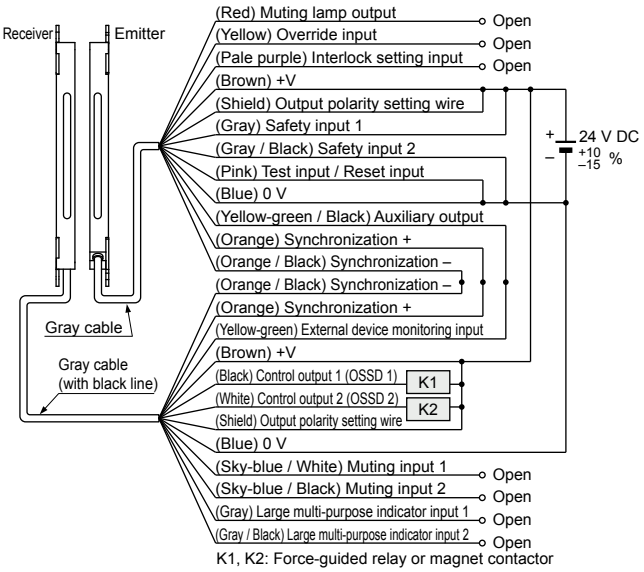
<In case of using I/O circuit for PNP output>



K1, K2: Force-guided relay or magnet contactor

Interlock function	Disabled (Automatic reset)
External device monitoring function	Disabled
Auxiliary output	Not used
Output polarity setting wire	PNP
Safety input	Invalid

<In case of using I/O circuit for NPN output>



K1, K2: Force-guided relay or magnet contactor

Interlock function	Disabled (Automatic reset)
External device monitoring function	Disabled
Auxiliary output	Not used
Output polarity setting wire	NPN
Safety input	Invalid

Refer to the instruction manual for details.
The instruction manual can be download from our website.

PRECAUTIONS FOR PROPER USE

- When this device is used in the “PSDI mode”, an appropriate control circuit must be configured between this device and the machinery. For details, be sure to refer to the standards or regulations applicable in each region or country.

- This catalog is a guide to select a suitable product. Be sure to read instruction manual prior to its use.
- Both emitter and receiver are adjusted before shipment, please apply both emitter and receiver with the same serial No. The serial No. is indicated on the plates of both emitter and receiver. (Indicated under model No.)

- Make sure to carry out the test run before regular operation.
- Do not install this safety light curtain with a machine whose operation cannot be stopped immediately in the middle of an operation cycle by an emergency stop equipment.

Others

- This device has been developed / produced for industrial use only.
- Do not use during the initial transient time (2 sec.) after the power supply is switched on.
- Avoid dust, dirt and steam.
- Take care that the sensor does not come in direct contact with water, oil, grease, or organic solvents, such as, thinner, etc.
- Take care that the sensor is not directly exposed to fluorescent lamp from a rapid-starter lamp or a high frequency lighting device, as it may affect the sensing performance.

Handy-controller

This safety light curtain enables to set each function using the handy-controller **SFC-HC** (optional). Among the functions, the contents related to the safety distance such as the size of the minimum sensing object and response time are varied depending on the setting condition. When setting each function, re-calculate the safety distance, and make enough space larger than the calculated safety distance. Failure to do so might cause the accident that the device cannot stop quickly before reaching the dangerous area of the machinery, resulting in the serious injury or death.

- Refer to the instruction manual of the handy-controller for details of the function settings for using handy-controller **SFC-HC** (optional).
