Deodorization

Activated Carbon Filter AMK Series

Weight reduced by 50%

AFF/AM/AMD20-D: 0.19 kg (Existing model: 0.38 kg)

Face-to-face and depth dimensions reduced by 30%

AFF/AM□30-D: □53 mm (Existing model: □76 mm)

(RoHS)

Modular connection is possible.

AFF/AM/AMD/AMK Series

The increased air flow capacity due to a reduced pressure drop contributes to energy saving.

Flow capacity

1500 L/min (ANR)

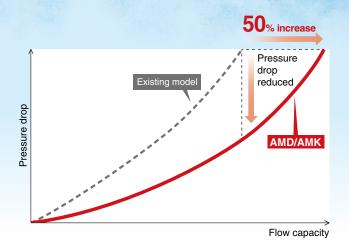

Micro mist separator AMD Series Activated carbon filter AMK Series

Pressure drop

Max. 50% reduction

AMD40: 6.8 kPa (Existing model AMD350C: 13.6 kPa) AMK40: 4.7 kPa (Existing model AMF350C: 9.4 kPa)

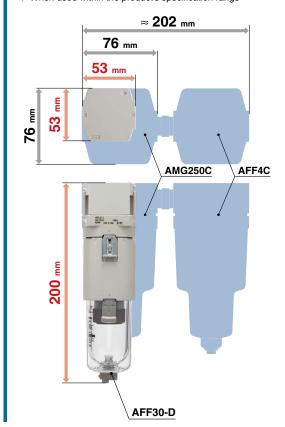

Space-saving design and reduced piping labor

AFF Series

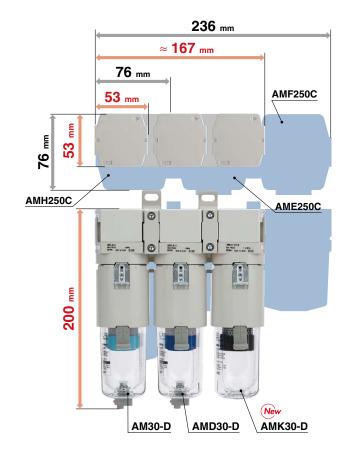

The AFF series line filter removes both water droplets and solid particles. It eliminates*1 the need for a separate filter for removing water droplets (water separator, AMG series), thus greatly reducing the face-to-face dimension and also reducing the required installation space and piping work.

*1 When used within the product's specification range

Modular connection

| | AMH250C + AME250C + AMF250C | AM30-D + AMD30-D + AMK30-D | |
|------------------------|-----------------------------------|----------------------------------|-------------------------|
| Face-to-face dimension | 236 mm | ≈ 167 mm | Approx. 69 mm reduction |
| Weight | 1.51 kg | 1.17 kg | 23% reduction |
| Flow capacity | 500 L/min (ANR) | 750 L/min (ANR) | 50% increase |

Lightweight

Weight

Max. 50% lighter*1

0.19 kg = 0.38 kg

| | 0 |
|----|---|
| *1 | Compared with existing products (AFF□C, AM□C, and |
| | AMD C sorios) |

^{*2} Compared with existing products (AMF series)

| Series | Size | Weight | Reduction rate |
|--------------|------|--------------------------|----------------|
| AFF/AM/AMD*1 | 20 | 0.19 kg ← 0.38 kg | 50% |
| | 30 | 0.39 kg ← 0.55 kg | 29% |
| | 40 | 0.79 kg ← 0.9 kg | 12% |
| AMK*2 | 20 | 0.19 kg ← 0.3 kg | 37% |
| | 30 | 0.39 kg ← 0.48 kg | 19% |
| | 40 | 0.79 kg ← 0.8 kg | 1.3% |

Color-identifiable elements This eliminates the accumulation of condensate. Even high-velocity fluid is not spattered. The result is a compact bowl design.

water flows to the downstream side.

Condensate

3 models (AFF/AM/AMD) with an end cap with slits

Transparent bowl guard (2-layer construction)

- The inside is visible from 360°.
- The bowl is completely protected from the environment, allowing for improved safety.

No tools are required.

Easy replacement of the element is possible as the element and the bowl are in one piece. Replacement can be done in hand.

Simple Specials System

A system designed to respond quickly and easily to your special ordering needs

 $For modular \ connection \ units \ (shipped \ assembled), \ the \ simple \ specials \ system \ can \ be \ used.$

Short lead times

This system enables us to respond to your special needs (additional machining, accessory assembly, or the designing of a modular unit) and deliver your personalized products as quickly as standard products.

Repeat orders

Once we receive a simple special part number from one of your previous orders, we will process the order, manufacture the product, and deliver it to you as quickly as possible.

Please contact your local sales representative for more details.

- *1 Drain guide is NPT1/8 (applicable to the AFF20, AM20, and AMD20) and NPT1/4 (applicable to the AFF30, AFF40, AM30, AM40, AMD30, and AMD40). The auto drain port comes with a ø3/8" One-touch fitting (applicable to the AFF30, AFF40, AM30, AM40, AMD30, and AMD40).
- *2 Drain guide is G1/8 (applicable to the AFF20, AM20, and AMD20) and G1/4 (applicable to the AFF30, AFF40, AM30, AM40, AMD30, and AMD40).
- *3 A bracket is not assembled and supplied loose at the time of shipment. Including 2 mounting screws
- *4 When pressure is not applied, condensate which does not start the auto drain mechanism will be left in the bowl. Releasing the residual condensate before ending operations for the day is recommended.
- *5 If the compressor is small (0.75 kW, discharge flow is less than 100 L/min

- (ANR)), air leakage from the drain cock may occur during the start of operations. N.C. type is recommended.
- *6 Refer to the chemical data on page 19 for chemical resistance of the bowl.
- *7 A bowl guard is provided as standard equipment (polycarbonate).
- *8 A bowl guard is provided as standard equipment (nylon).
- *9 The combination of float type auto drain C and D is not available.
- *10 Without a valve function The mounting screws are the same as the thread of 3.
- The combination of metal bowl 2 and 8 is not available.
- *12 For pipe thread type: NPT
 - This product is for overseas use only according to the new Measurement Act. (The SI unit type is provided for use in Japan.)
- *13 O: For pipe thread type: NPT only

- *1 For the following conditions in addition to the conditions above
 - · When a micro mist separator (AMD series) is installed on the inlet side
 - · When the air flow capacity, upstream pressure, and oil concentration on the filter inlet side are stable
 - · When a new element is used
- *2 The bowl seal and other O-rings are slightly lubricated.
- *3 The compressed air purity class is indicated based on ISO 8573-1:2010 Compressed air Part 1: Contaminants and purity classes. For details on this standard, refer to page 18.
- *4 The compressed air quality class on the inlet side is [1:4:2].
- *5 Inlet pressure: 0.7 MPa

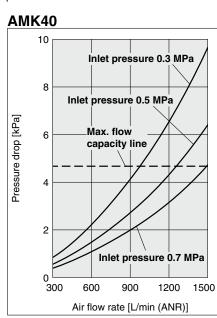

Flow at 20°C, atmospheric pressure, and 65% of the relative humidity

Flow Rate Characteristics (Representative values)

* Compressed air over the max. flow capacity line in the table below may not meet the specifications of the product.

International Standard ISO 8573-1:2010 Compressed Air Purity Classes

Compressed air is used in a variety of manufacturing processes. In this age, compressed air with a high degree of purity is becoming increasingly necessary.

For this reason, it is necessary to remove contaminants from systems which supply compressed air and to secure the quality. The standard which stipulates the class according to the quantities of contaminants in compressed air is ISO 8573-1.

[Outline]

Stipulates the purity class of contaminants (particles, water, oil) mixed in with the compressed air

[Scope]

Can be used in various places in compressed air systems

[Terms and Definitions]

- Purity class: An index assigned for each classification obtained by dividing the concentration of each contaminant into ranges
- · Particle: Small discrete mass of solid or liquid matter
- Humidity and liquid water: Water vapor (gas), Water droplets
- · Oil: Liquid oil, Oil mist, Vapor

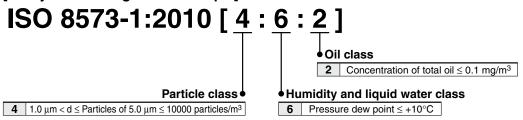

| | _ | Part | icles | | Humidity and | d liquid water | Oil | | | | | |
|-------|--------------------------|--|-------------------------------|-----------------------|--------------------|----------------------------------|----------------------------|--|--|--|--|--|
| Class | Maximum number of partic | les per cubic meter as a fun | ction of particle size d [µm] | Mass concentration Cp | Pressure dew point | Concentration of liquid water Cw | Concentration of total oil | | | | | |
| | $0.1 < d \le 0.5$ | $0.5 < d \le 1.0$ | $1.0 < d \le 5.0$ | [mg/m ³] | [°C] | [g/m ³] | [mg/m³] | | | | | |
| 0 | | As specified by the equipment user or supplier and more stringent than class 1 | | | | | | | | | | |
| 1 | ≤ 20000 | ≤ 400 | ≤ 10 | _ | ≤ –70 | _ | ≤ 0.01 | | | | | |
| 2 | ≤ 400000 | ≤ 6000 | ≤ 100 | _ | ≤ −40 | _ | ≤ 0.1 | | | | | |
| 3 | _ | ≤ 90000 ≤ 1000 | | _ | ≤ –20 | _ | ≤ 1 | | | | | |
| 4 | _ | _ | ≤ 10000 | _ | ≤ +3 | _ | ≤ 5 | | | | | |
| 5 | _ | _ | ≤ 100000 | _ | ≤ +7 | _ | _ | | | | | |
| 6 | _ | _ | _ | 0 < Cp ≤ 5 | ≤ +10 | _ | _ | | | | | |
| 7 | | | | 5 < Cp ≤ 10 | _ | Cw ≤ 0.5 | _ | | | | | |
| 8 | _ | _ | _ | _ | _ | 0.5 < Cw ≤ 5 | _ | | | | | |
| 9 | _ | _ | _ | _ | _ | 5 < Cw ≤ 10 | _ | | | | | |
| Х | 1 | 1 | 1 | Cp > 10 | _ | Cw > 10 | > 5 | | | | | |

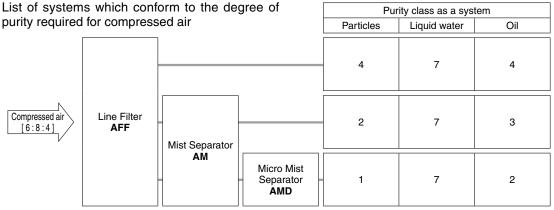

[How to Perform a Test to Check the Performance]

ISO 12500, which sets out the test method to be used in order to check the filter performance for each of the three kinds of contaminants, is indicated below.

- Particle: ISO 12500-3:2009
- · Liquid water: ISO 12500-4:2009
- · Oil: ISO 12500-1:2007
- * Measured using a dedicated evaluation system which has been certified according to ISO 12500-□ and also by a third party (Certified)

[Purity Class Designation Example]

The class indicates the compressed air purity according to ISO 8573-1:2010 (JIS B 8392-1:2012) and indicates the maximum purity class which can be obtained using that system. Note, however, that this value will differ according to the inlet air conditions.

AFF/AM/AMD/AMK Series Specific Product Precautions 1

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For air preparation equipment precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

Design

∆Warning

1. Resin is used for some of the external parts such as the bowl (Material: polycarbonate).

Do not use the product when the following organic solvents are present in the atmosphere: synthetic fluid, chemicals including acetone, alcohol, ethylene chloride, sulphuric acid, nitrate, hydrochloric acid, cutting oil, kerosene, gasoline, and thread lock adhesive

Effects of organic solvents and chemicals on the equipment. Shown below is the chemical data of substances which cause degradation for reference.

| Typo | Chemical name | Application | Material | |
|---|--|---|---------------|-------|
| Type | | examples | Polycarbonate | Nylon |
| Acid | Hydrochloric acid Sulfuric acid Phosphoric acid Acetic acid Chromic acid | Acid washing liquid for metals | Δ | × |
| Alkaline | Sodium hydroxide (Caustic soda) Potash Calcium hydroxide (Slack lime) Ammonia water Sodium carbonate | Degreasing of metals Industrial salts Water-soluble cutting oil | × | 0 |
| Inorganic salts | Sodium sulfide Potassium nitrate Sodium sulfate | _ | × | Δ |
| Chlorine solvents | Carbon tetrachloride Chloroform Ethylene chloride Methylene chloride | Cleansing liquid for metals Printing ink Dilution | × | Δ |
| Aromatic series | Benzene Toluene Paint thinner | Coatings Dry cleaning | × | Δ |
| Ketone | Acetone Methyl ethyl ketone Cyclohexane | Photographic film Dry cleaning Textile industries | × | × |
| Alcohol | Ethyl alcohol IPA Methyl alcohol | Antifreeze Adhesives | Δ | × |
| Oil | Gasoline Kerosene | _ | × | 0 |
| Ester | Phthalic acid dimethyl Phthalic acid diethyl | Synthetic oil Anti-rust additives | × | 0 |
| Ether | Methyl ether Ethyl ether | Brake oil additives | × | 0 |
| Amino | Methyl amino | Cutting oil Brake oil additives Rubber accelerator | × | × |
| Others | Thread-lock fluid Seawater Leak tester | _ | × | Δ |
| O: Essentially safe △: Some effects may occur. ×: Effects will occur. | | | | |

When the above factors are present, or there is some doubt, use a metal bowl for safety.

Design

△Warning

- 2. Applications in which the difference between the inlet and outlet pressure exceeds 0.1 MPa must be avoided. Failure to do so may result in element breakage.
- For air blow applications, prevent airborne particles from the operating environment from entering into the compressed air stream. Foreign matter may adhere to workpieces during air blow as a result.
- 4. If air equipment is installed on the outlet side of the product, particles may be generated from the equipment and thus the required cleanliness may not be obtained. Please consider installing air equipment on the inlet side of the product.

⚠Caution

 The activated carbon filter (AMK series) adsorbs the oil vapor contained in compressed air and removes the odor derived from it, but it does not remove all odor.

Selection

_Marning

- 1. Select a model so that the max. discharge (instantaneous) flow rate value does not exceed the rated air capacity.
- 2. Use the N.O. type auto drain under the following conditions to avoid a malfunction.

Output of compressor: 0.75 kW or more

Discharged flow rate: 100 L/min (ANR) or more

If multiple auto drains are to be used, confirm whether the compressor has a sufficient capacity by multiplying the above capacity by the number of auto drains to be used. { For example, in order to use 2 auto drains, the compressor needs a capacity of 1.5 kW [200 L/min (ANR)] or more. } Set the operating pressure at 0.1 MPa or more.

3. Use the N.C. type auto drain under the following conditions to avoid a malfunction.

Operating pressure for the AD27-D: 0.1 MPa or more Operating pressure for the AD37-D/AD47-D: 0.15 MPa or more

Mounting

_Warning

- 1. Connect the product according to the "1"(IN) and "2"(OUT) indications or the arrows for air direction. Incorrect connection may result in a malfunction.
- 2. Install with adequate space for maintenance beneath the product. Refer to the dimensions of each part for the necessary amount of space.
- 3. Install vertically so that the drain outlet turns downward. Using with the drain outlet turned horizontal or upward may result in a malfunction.

AFF/AM/AMD/AMK Series Specific Product Precautions 2

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For air preparation equipment precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

Piping

_Warning

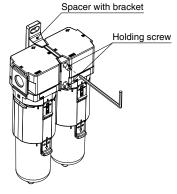

1. Tighten the 2 holding screws on the spacer with bracket or spacer evenly.

Tighten them to the recommended tightening torque. Insufficient tightening torque may result in loosening or sealing failure. Excessive tightening torque may damage the thread, etc.

Recommended Torque

| Spacer with bracket part number | Y200T-D | Y300T-D | Y400T-D | | |
| Spacer part number | Y200-D | Y300-D | Y400-D | | |
| Torque | 0.36 ±0.036 | 1.2 ±0.05 | 1.2 <u>+</u> 0.05 | | |

2. Piping load and moment

Avoid any torsional or bending moments other than those caused by the equipment's own weight as failure to do so may result in damage.

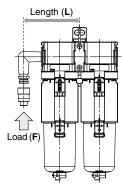

Support external piping separately. If moment application is unavoidable during operation, the moment should be lower than the max. moment shown below.

Piping materials without flexibility, such as steel tube piping, are prone to being affected by excess moment loads or vibrations from the piping side. Use flexible tubing in between to avoid such effects.

Unit: N·m

| Applicable model | AFF20 AM20 AMD20 AMK20 | AFF30 AM30 AMD30 AMK30 | AFF40 AM40 AMD40 AMK40 |
|------------------|---------------------------------|---------------------------------|---------------------------------|
| Max. moment (M) | 14.5 | 16 | 19.5 |

Max. moment (M) = Length (L) x Load (F)

Piping

≜Warning

Connect piping/fittings using the recommended torque while holding the female thread side tightly.

Insufficient tightening torque can result in loose piping or sealing failure. Over tightening may break the thread. If the female side is not held while tightening, excessive force will be applied to the bracket directly, resulting in breakage.

| Recommended Tightening Torque Unit: | | | | |
|-------------------------------------|--------|----------|----------|----------|
| Connection thread | 1/8 | 1/4 | 3/8 | 1/2 |
| Torque | 7 to 9 | 12 to 14 | 22 to 24 | 28 to 30 |

4. When an SMC One-touch fitting is used, refer to the operation manual for the One-touch fitting.

Air Supply

△Warning

1. Air containing too much moisture may deteriorate product performance. Install a refrigerated air dryer or an aftercooler on the inlet side of the product.

⚠Caution

1. Install a micro mist separator (AMD series) on the inlet side of the activated carbon filter (AMK series) to avoid performance degradation.

Maintenance

_ Warning

- Replace the element according to the replacement timing explained below. Failure to do so may result in element breakage.
 - a. AFF20 to 40-D, AM20 to 40-D, and AMD20 to 40-D Within 2 years from the start of use or prior to a product pressure drop (difference in outlet pressure in relation to the inlet pressure) of 0.1 MPa
 - b. AMK20 to 40-D

1 year from the start of use or before the service life reaches 2000 hours (The replacement timing of the element varies depending on the operating conditions. Even before the above replacement timing is reached, if an oil smell is emitted from the outlet, replace the element periodically thereafter.)

∧Caution

 For the N.C. type auto drain, when there is no pressure, condensate, which is not enough to activate the auto drain mechanism, will remain in the bowl. It is recommended that the residual condensate be released manually at the end of each work day.

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

Caution: Caution indicates a hazard with a low level of risk which, If not avoided, could result in minor or moderate injury.

Warning: Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Danger: Danger if not avoided, will result in death or serious injury. **Danger** indicates a hazard with a high level of risk which, *1) ISO 4414: Pneumatic fluid power - General rules relating to systems.

ISO 4413: Hydraulic fluid power – General rules relating to systems.

IEC 60204-1: Safety of machinery - Electrical equipment of machines. (Part 1: General requirements)

ISO 10218-1: Manipulating industrial robots - Safety.

⚠Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.

- 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
- 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
- 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
- 4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
 - 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
 - 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
 - 3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
 - 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

⚠ Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.

If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/ **Compliance Requirements**

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

Limited warranty and Disclaimer

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2) Also, the product may have specified durability, running distance or
 - replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- 3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.
 - 2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

- 1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

⚠ Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Revision History

- Edition B * The AMK series activated carbon filter has been added.
 - * Number of pages has been increased from 16 to 24.

ZO

↑ Safety Instructions Be sure to read the "Handling Precautions for SMC Products" (M-E03-3) and "Operation Manual" before use.
