

For High-Pressure Water

Pilot Operated 2-Port Solenoid Valve

Can be used at up to **10 MPa**

*For high-pressure
washing*

For water spraying

For misting

An **IP67**^{*1} structure
with improved
environmental resistance

*1 The DIN terminal is IP65.

JSXH-X2

Orifice diameter [mmØ]

12

Flow Rate Characteristics [Kv]

1.7 (Port size 3/8)

1.9 (Port size 1/2)

Power consumption

8 W

Weight

960 g (Port size: 3/8)

920 g (Port size: 1/2)

Easy maintenance

The coil can be replaced by simply removing the clip.

The main valve can be cleaned and replaced by simply removing the cover.

Electrical entry variations

Improved environmental resistance

- Dustproof/waterproof IP67 structure
- With a stainless steel coil cover

**Passed
1000 hours**

**Accelerated
weathering test**

ISO 4892-3 (JIS K 7350-3) compliant

**Passed

*1 The value for water at a differential pressure of 0.1 MPa or higher and an ambient temperature of 20°C

*2 This product has an IP67 enclosure, but if water enters the product, it may result in malfunction or breakage.

Therefore, take appropriate measures to prevent water from entering the product when using in an environment where it is constantly exposed to water.

*3 Add 20 g for the grommet type with PCB, 70 g for the conduit type, 50 g for the DIN terminal type, and 15 g for the type without a DIN connector and the M12 connector type.

*4 Only DC is available for the grommet type.

*5 Power consumption/Apparent power: The value at an ambient temperature of 20°C and when the rated voltage is applied (Variation: ±10%)

*6 There is no difference in the frequency and the inrush and energized apparent power, since a rectifying circuit is used in the AC.

*7 Temperature rise: The value at an ambient temperature of 20°C and when the rated voltage is applied. Use this value as a reference as the actual value varies depending on the ambient environment.

Be sure to read the “Specific Product Precautions” before handling the product.

Specific Product Precautions

Be sure to read this before handling the products. For safety instructions and 2-port solenoid valve for fluid control precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

Design

Warning

1. Water hammer

When an impact, such as water hammer, etc., caused by rapid pressure fluctuation is applied, the valve may be damaged, so be sure to install a water hammer relief device such as an accumulator.

2. Leakage when supplying fluid

Be aware that when the valve is closed, sudden pressure resulting from the startup of the fluid supply source may cause the valve to open momentarily and leakage to occur.

Fluid

Warning

1. Fluid selection

This product can only be used with water as the fluid. Do not use the product with the fluids shown below.

- 1) Fluids that are harmful to humans
- 2) Combustion-supporting or flammable fluids
- 3) Corrosive gases
- 4) Sea water, Saline solutions
- 5) Oils, Air
