Compact Rotary Actuator

CRQ2 Series

Rack & Pinion Type/Size: 10, 15, 20, 30, 40

Compact Rotary Actuator

Rack & Pinion Type/Size: 10, 15, 20, 30, 40

Rotary actuator body serves as a flange.

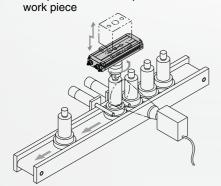

Built-in cushion

10, 15 : Rubber bumper 20, 30, 40 : Air cushion

Equipped with an angle adjusting mechanism (±5°

Piping can be installed from one end.

- Double piston type Compact, with no backlash
- Both single shaft and double shaft are available in all sizes.
- 360° type application example
 Complete external inspection of a

360°

360° type

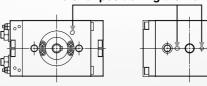

CRQ2 Series

2 auto switches are mountable on the same side. (Mountable on the both sides.)

Mounting smaller auto switches prevents the auto switch from protruding from the body edge and realizes space-savings.

Centering is easy when mounting the main body.

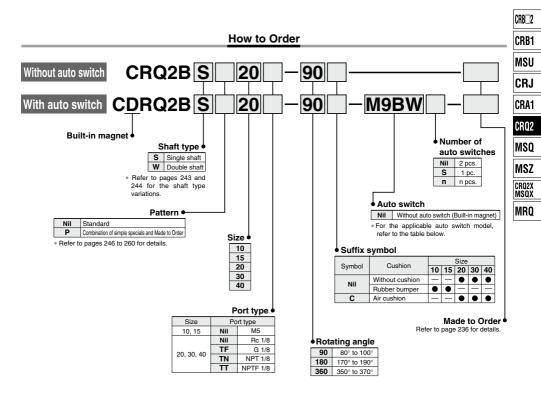

Pin hole for positioning the main body

Moisture **Control Tube IDK Series**

When operating an actuator with a small diameter and a short stroke at a high frequency, the dew condensation (water droplet) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the IDK Series in the **Best Pneumatics No.6.**

Specifications

30	0.048	_	0.25	40°	0.2 to 1
40	0.081	I	0.4	40°	0.2 to 1

^{*} Allowable kinetic energy for the bumper equipped type

If operated where the kinetic energy exceeds the allowable value, this may cause damage to the internal parts and result in product failure. Please pay special attention to the kinetic energy levels when designing, adjusting and during operation to avoid exceeding the allowable limit.

Weight

			(g)

Operating angle θ m: The value of the individual switch's movement range Lm as represented by an angle.

Hysteresis angle: Value of the switch's hysteresis as represented by an angle.

Note) Since the above values are only provided as a guideline, they are not guaranteed. In the actual setting, adjust them after confirming the auto switch performance.

Specifications

Applicable size	10, 15, 20, 30, 40
Applicable shaft type	S, W, X, T, J shaft

Short shaft side ≥ I Long shaft side

Size 10, 15

		(mm)
Size	М	Н
10	10	17 (—)*
15	11	19 (—)*
20	16.5	28.5 (19.5)*
30	20	30 (22)*
40	22	34 (25)*

* For X shaft

Size 20, 30, 40

CRQ2 Series Made to Order Specifications 2

Please contact SMC for detailed dimensions, specifications and lead times.

Symbol -XC8 to XC11, XC18/XC19

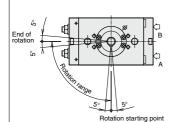

Additional Reminders

The rotation starting point shows the positions of one flat chamfering and the key groove when pressurized to the connecting port (B).

Angle adjustment at the rotation starting point and the end point are at $\pm 5^{\circ}$. Rotating range is changed. Rotation angle is at $90^{\circ} \pm 10^{\circ}$

Rotating range is changed. Rotation angle is at 90° ±10°. The rotation starting point is on the perpendicular line (down).

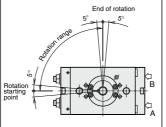

The figure shows the view from the long shaft end.

Symbol: C9

Angle adjustment at the rotation starting point and the end point are at $\pm 5^{\circ}$. Rotating range is changed. Rotation angle is at $90^{\circ} \pm 10^{\circ}$.

The rotation starting point is on the horizontal line (left).

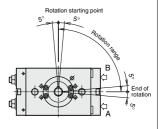

The figure shows the view from the long shaft end.

Symbol: C10

Angle adjustment at the rotation starting point and the end point are at ±5°.

Rotating range is changed. Rotation angle is at 90° ±10°.

Rotating range is changed. Rotation angle is at 90° ±10°. The rotation starting point is on the perpendicular line (up).

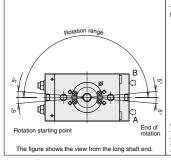

The figure shows the view from the long shaft end.

Symbol: C11

Angle adjustment at the rotation starting point and the end point are at $\pm 5^{\circ}$.

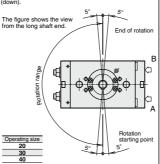

Rotating range is changed. Rotation angle is at 180° ±10' The rotation starting point is on the horizontal line (left).

Symbol: C18

Angle adjustment at the rotation starting point and the end point are at $\pm 5^{\circ}$.

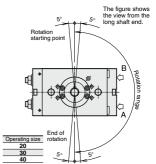

Rotating range is changed. Rotation angle is at $180^\circ\,\pm10^\circ$ The rotation starting point is on the perpendicular line

Symbol: C19

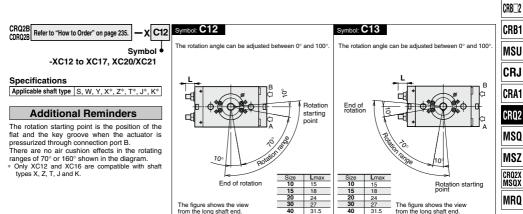

Angle adjustment at the rotation starting point and the end point are at $\pm 5^{\circ}.$

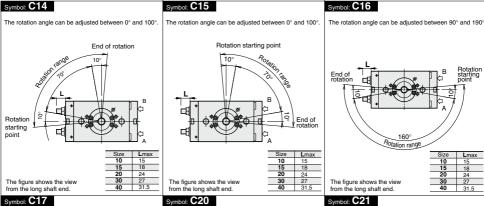

Rotating range is changed. Rotation angle is at $180^{\circ} \pm 10^{\circ}$. The rotation starting point is on the perpendicular line (up)

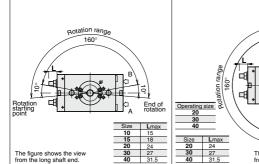

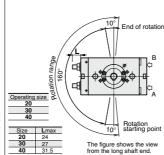

Symbol -XC12 to XC17, XC20/XC21

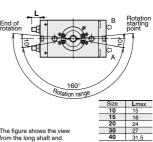

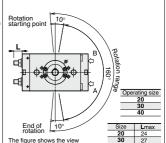

The rotation angle can be adjusted between 90° and 190°.

The rotation angle can be adjusted between 90° and 190°

from the long shaft end.

The rotation angle can be adjusted between 90° and 190°

CRQ2 Series Made to Order Specifications 3

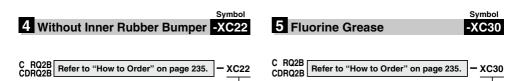

Without inner

rubber bumper

Fluorine grease

Please contact SMC for detailed dimensions, specifications and lead times.

Fluorine grease is used as lubricant oil in seal part of packing and inner wall of cylinder. (Not for low-speed specification.)

Specifications

Fluid	Air (Non-lube)
Applicable size	10, 15
Max. operating pressure	0.7 MPa
Min. operating pressure	0.15 MPa
Port size	M5 x 0.8
Rotation	80° to 100°, 170° to 190°, 350° to 370°
Applicable shaft type	S, W, X, Y, Z, T, J, K
Auto switch	Mountable

^{*}Refer to page 236 for other specifications.

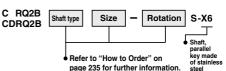

Refer to pages 239 and 240 for other specifications.

Seal material is changed to fluororubber

Stainless steel is used as a substitute material for standard parts when used under conditions with a possibility of oxidization or decay.

Fluid	Air (Non-lube)
Applicable shaft type	S, W, X, Y, Z, T, J, K
Applicable size	20, 30, 40
Max. operating pressure	1.0 MPa
Min. operating pressure	0.1 MPa
Cushion	Not attached, Air cushion
Rotation range	80° to 100°, 170° to 190°, 350° to 370°
Stainless steel part	Shaft, Parallel key
Port size	Rc 1/8, G 1/8, NPT 1/8, NPTF 1/8
Auto switch	Mountable
